Address of Contractor: _____

Owners Name: _____

Location of Demolition/Structure: _____

Start Date of Demolition: _____ Projected Completion Date: _____

Description of Demolition: _____

Copy of Contractors Liability Insurance attached: Yes No

DPW Utilities Present: Yes No

Guidelines for Water and Sewer Disconnection if City Utilities are present:

Water Service Line- Public Water Service line should be turned off at the **Right of Way** (Curb Stop to feed line) by City personnel.

Water Service line must be cut and capped at the **foundation wall below the Frost Line** or the location where **line enters** the structure. This will provide separation from the interior dwelling plumbing.

Sewer Service Line- The main sewer lateral line must be cut and capped (covered **and sealed then cemented shut**) at the basement floor level or at the site where the sewer pipe enters the dwelling.
